

In the Claims

1. (Amended) A mitt removably associated with a vehicle washing brush comprising:

A 4 a material formed into the approximate shape of said washing brush, wherein said material is capable of fitting around said washing brush, and said material has a first surface facing and in contact with said washing brush, and a second surface opposite said first surface facing away from said washing brush, and wherein said second surface is woven with fibers capable of washing a surface of a vehicle, and said material is capable of allowing the passage of water from said washing brush;

a fastener capable of securing said mitt onto said brush while water passes through said washing brush.

- A 5 3. (Amended) The mitt of claim 1, wherein said fastener comprises at least one VELCRO® strap.

- A 6 9. (Amended) A self-service vehicle wash comprising the mitt of claim 1.

Please add the following new claim 16 and 17:

16. A foaming brush mounted to a self-service car wash comprising a removable mitt according to claim 1. *MS.*

- A 7 2 17. A foaming brush *how* removably mounted *MS.* to a self-service car wash comprising a cover adapted to fit over said brush.--

*how can  
brush comprise  
a cover to  
fit over said  
brush*
